PRO

AN **ESAB**® BRAND

CNC PLASMA CUTTING SYSTEM

Introducing the Swift-Cut Pro

A collection of four cutting edge CNC plasma machines. With its precision guide system and robust design, the Swift-Cut Pro range promises high speed precision cutting at a low cost investment. Easy to use, simple to learn and operate with exceptional aftercare and support, the Swift-Cut Pro range is the answer to affordable in-house metal cutting.

Why choose a Swift-Cut Pro?

The Pro has been continuously developed over the past 10 years. From its inception to now, the range has gone from strength to strength and is now the leading light industrial CNC cutting machine. With intuitive software, industry leading features, and seven different base options, the Pro range is designed to deliver fantastic and reliable cutting performance in a package built to last.

Our Swift-Cut Pro is Europe's number one selling CNC plasma machine in its class!

The Swift-Cut Pro range comes with advanced industry leading features as standard, combined with easy to use and intuitive software. The Pro range is designed to take metal cutting to another level - its incredible capabilities offer exceptional high-end cutting solutions at amazingly low prices.

INTELLIGENT TORCH HEIGHT CONTROL

Never have to set up torch height control yourself. Automatic voltage sampling provides repeatable cut quality and increased consumable life compared to conventional Torch Height Control systems.

INITIAL HEIGHT SENSE

The Soft Sense system enables you to repeatedly and accurately sense the top of the thinnest to the thickest of materials without distortion of the plate.

HYBRID SERVO MOTORS

Repeatable positional accuracy, monitored torque delivery and smooth motion.

FULLY ENCLOSED CUTTING HEAD

Fully enclosed cutting head offers protection to key components against the harsh cutting environment.

LASER POSITIONING CROSSHAIR

Laser crosshair aids in setting the torch start position.

ENGRAVING TOOL

The SwiftMARK engraving tool allows you to mark and cut in one operation, meaning no more outsourcing or moving your project from one machine to another (optional extra).

BREAKAWAY HEAD

Prevents damage to the torch should an unexpected collision occur.

MACHINE BED OPTIONS

The water bed option offers efficient fume suppression so that in most cases no external fume extraction is required. Alternatively, the zoned downdraft bed option captures fumes and particulate from beneath the cutting area when connected to an extractor or filtration unit.

SOFTWARE

Easy to use SwiftCAM and SwiftCNC software included as standard.

HEAVY DUTY GANTRY

Heavy duty gantry end castings with machined faces, together with the lightweight but rigid gantry provide a precise and stable platform for the cutting head. It also supports twin x-axis linear rails.

FULLY ENCLOSED DRAG CHAINS

Fully enclosed drag chains protect cables against damage from molten material.

LINEAR RAIL ON ALL AXES

Straight, accurate and repeatable movements, they also deliver a smoother motion compared to other guide systems.

FULLY WELDED BASE

Heavy duty base provides support and rigidity.

OPERATORS CONSOLE

Ergonomic operators console with touch screen and keyboard/mouse inputs.

“

Swift-Cut tables are ruggedly built, easy to use, have great accuracy and most importantly, give an excellent cut.

Alan Bradford, Plasmatech

”

Main Key Features:

- Intelligent Torch Height Control (ITHC) and Soft Sense initial height sense ensure the perfect pierce and cut height no matter what thickness of material
- SwiftCAM and SwiftCNC software included as standard
- 360° breakaway head with auto-reset in the event of a collision
- Downdraft and water table cutting bed options available. Pro 613 only available as a water table.
- Designed, engineered, and fully supported by the Swift-Cut team
- Fully welded base and compact footprint ensure the machines take up the minimum amount of space required
- Freestanding operators console can be positioned on either side of the machine
- A choice of six plasma power sources with capacities from 0.02" to 1"

The Swift-Cut Pro has been designed by our skilled team of engineers to provide an all-encompassing plasma cutting solution with industry leading features as standard and is available in 4 sizes.

Table Specifications

Pro 44
4' x 4' cutting area

Pro 48
4' x 8' cutting area

Pro 510
5' x 10' cutting area

Pro 613
6' x 13' cutting area

	Pro 44	Pro 48	Pro 510	Pro 613
Table Footprint	6.5' x 6'	10.5' x 6'	12.5' x 7'	15.5' x 8.5'
Table weight	1763lbs	2204lbs	2425lbs	2866lbs
WT Capacity	42 US Gallons	79 US Gallons	116 US Gallons	212 US Gallons
Height	60"			
Cutting envelope	4' x 4'	8' x 4'	10' x 5'	13' x 6.5'
Z-Axis travel	5.1"			
Maximum supported material load	41lbs/sq. ft			
Drive description	Hybrid servo motors and double sealed linear bearings on all axes. Enclosed ballscrew driven Z-Axis. Dual driven Y-Axis.			
Gantry Clearance	6"			
Maximum material thickness	1"			
Maximum cut capacity of box section	4"			
Fume extraction method	Water table or Dwindraft			Water table
Input Voltage	110-230VAC (6-4A)			
Input Air Pressure	100-110PSI			
Flow rate	10CFM			

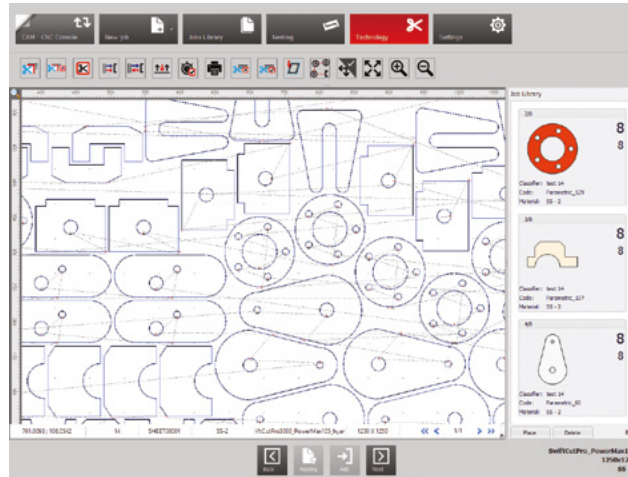

SwiftCAM Software (features)

Standard

- JPEG/DXF/DWG import capable** - Import .dxf or .dwg files or convert .jpg images for cutting
- Automatic Lead in/out** - Software automatically applies lead in/out for quicker programming
- Automatic nesting*** - Automatically nests parts for economical sheet usage
- Part in part nesting** - Nest parts in scrap areas to fully utilise sheet**
- Advanced Drawing Importer** - Built in system to clean, scale or delete items within problematic drawings
- Parametric shape library** - 89 configurable shapes

* Advanced SwiftCAM only

** Can be done manually in standard software or automatically in SwiftCAM Advanced

SwiftCNC Software (features)

- G-Code Browser** - Allows the user to start cutting from any individual profile within the G-code
- Cut recovery** - This function allows the user to start from any position along the cut path whilst maintaining cut accuracy and reducing material waste
- Direct Cut Control** - Remote control of settings for Hypertherm Powermax plasma systems
 - Automatic control of cutting amps
 - Automatic control of air pressure
 - Automatic control of cut mode
 - Read fault codes from the operator's console
 - Continuous arc mode - A simple unique solution allowing operators to cut wire mesh and perforated materials with the Hypertherm Powermax plasma systems
- Basic and advanced displays** - Basic view for beginners and advanced view for more experienced operators
- G-code Favourites** - Save up to 5 G-code files for quick loading
- G-Code queue** - Queue up to 5 G-Code files for quick loading

Sheet trim - Easily trim off scrap material. Options to go between 2 or 3 points on the material

Sheet alignment - Simply use the plasma shield to reference the two bottom corners of the sheet and the software will automatically adjust your part(s) or nest to the new angle. This will ensure the plasma arc will not 'run off' the material as it travels up the cutting bed

Datum store - Don't lose a datum point again, this system stores your last datum point so even if you lose power, you will not lose your position

Configurable datum points - Set up to 5 datum points anywhere on the cutting bed. This can be used to reduce setup times when using jig fixtures or to set custom parking positions

Dry-run mode - View the plasma torch movement, cutting order and speed in real time before you switch on the arc, so any problems are found and corrected without wasting material unnecessarily

Touchscreen display - Seamlessly switch between the wireless keyboard and mouse or the touchscreen display

Graphical toolpath display - Visual representation of where you are on the toolpath

“Ease of use was a major deciding factor. The software is very user friendly and requires little prior computer skills.”

Delmer Yomer, Wellspring Components, USA

Operator console spec

- Touchscreen HMI with wireless keyboard and mouse control
- Footprint – 21" x 23"
- Height – 62"
- Weight – 88lbs
- Operating system – Windows 10, 64 bit
- Software included – SwiftCAM, SwiftCNC
- Remote support application installed as standard

Cutting Power Options

Plasma Source: Hypertherm and ESAB

Max pierce capacity	Mild steel	Stainless steel	Aluminium	Duty cycle	100% duty cycle
Powermax45 SYNC™*	1/2"	3/8"	3/8"	50%	32Amps
Powermax65 SYNC™*	5/8"	1/2"	1/2"	50%	46 Amps
Powermax85 SYNC™*	3/4"	5/8"	5/8"	60%	66 Amps
Powermax105 SYNC™	7/8"	3/4" low use	3/4"	80%	94 Amps
Powermax125	1"	7/8"	7/8"	100%	125 Amps
ESAB A120*	3/4"	5/8"	5/8"	80%	100 Amps

* Single phase option available

Air Spec

- Clean, dry air supply that should meet ISO8573-1 class 1.2.2.
- Input air pressure – 100-110 PSI
- Flow rate – 10 CFM

Options

- SwiftMARK engraving tool
- Zoned Downdraft (DD) or Water Table (WT)
- Powermax and A120 consumable kits
- SwiftCAM Advanced software
- Compressor options available
- Air dryer options available
- 3 stage compressed air filtration
- Filtered extraction or extractor fan options for Downdraft machines
- Anti-rust solution
- Anti-fungal tablets
- Wireless or hardwired internet connections

Swift-Cut aftercare is second to none

We take as much pride in helping our customers after the sale as we do when we are making the sale, and every aspect of the user being able to get the absolute best from their Swift-Cut Pro has been thought about. Whether you need remote assistance, advice, or an engineer's visit, we will always make sure that you are getting the very best in aftercare.

There are a number of options to choose from when you come to decide how you wish to maintain your machine, and with over forty years combined experience in plasma and waterjet cutting, we have great knowledge when it comes to cutting on many different grades and types of material.

To enable us to support and train our global customers and sales partners, Swift-Cut has invested heavily in technology that allows us to provide remote services by using Smartphone, Tablet and Wearable Technology via collaborative software tools to train, assist and diagnose the problem with precision and in less time. The My Swift-Cut app allows us to provide real-time video support which minimises time spent on the job and keeps machine downtime to a minimum.

We offer interactive online service kits which are designed to keep your cutting table running at its best, with the minimal amount of downtime. As part of the package, our support team will dial in remotely and talk you through the service procedure, step-by-step.

In addition to the standard warranties that come with all our cutting tables, if you feel you need more, you can purchase extended warranties which can cover all aspects of support, parts or both, giving you even more peace of mind. Contact a member of our team for further details.

“

Swift-Cut has enabled us to diversify from our primary business into an area we would never have ventured into.

Leightec

”

Swift-Cutter CNC family

Here at Swift-Cut we build long-standing relationships with our customers, with many buying multiple machines from us over time.

Once you buy a Swift-Cut table, you become part of our family, we'll share what you do and let you know what other Swift-Cutters are up to.

Our social media pages are an interactive platform where we hope our customers feel at home, or check out our Swift-Cutters Case Studies page on our website for more idea of what your fellow Swift-Cutters are up to and how they get the very best from their machines.
